

# THE FIDELITY SELF-EMPLOYED 401(k) CONTRIBUTION WORKSHEET FOR UNINCORPORATED BUSINESSES

## Calculating Your Maximum 2010 Plan Year Contribution

If you are self-employed, the worksheet on the other side of this page may help you to calculate your retirement plan contributions.\* However, you are strongly advised to consult with a tax advisor or accountant when calculating your contribution amounts. You may also refer to IRS Publication 560 for further information.

A Fidelity Retirement Representative is available at 1-800-544-4774 from 8 a.m. to 8 p.m. Eastern time, seven days a week, to answer questions regarding your retirement plan.

### To begin:

- Have your income tax forms nearby (particularly Form 1040 and either Schedule C, Schedule C-EZ, or Schedule K-1). They contain the necessary information to complete your worksheet.

**Step 1:** Using Schedule SE (Form 1040), calculate your self-employment tax deduction. This form is available online at <http://www.irs.gov/pub/irs-pdf/f1040sse.pdf>.

**Step 2:** Calculate your maximum contributions.

- You may make a maximum salary deferral contribution of up to 100% of compensation, not to exceed \$16,500 for 2010 and 2011.
- If you are age 50 or older (in the calendar year for which you are making the contribution) you may be able to defer an additional \$5,500 for 2010 and 2011, referred to as a catch-up contribution.
- Your maximum annual deductible contribution for profit sharing is 25% of compensation up to a total of \$49,000 for 2010 and 2011. The maximum compensation on which contributions can be based is \$245,000 for 2010 and 2011. For self-employed individuals, compensation means earned income.
- Total profit sharing and salary deferral contributions may not exceed \$49,000 for 2010 and 2011 (\$54,500 if age 50 or older).

\* If you have more than one source of income or participate in another salary deferral plan, this calculation will not be accurate. You are advised to consult with your tax advisor or accountant.
